Re: Request for Information Pursuant to Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9604(e), PROTECO Site, Peñuelas, Puerto Rico

Dear Ms. Sotamaa:

The United States Environmental Protection Agency ("EPA") is charged with responding to releases or threatened releases of hazardous substances, pollutants, and/or contaminants into the environment, and with enforcement responsibilities under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. §§ 9601-9675 ("CERCLA"), also known as the "Superfund" law. For your information, a copy of the Superfund law may be found at www.epa.gov/superfund.

EPA has documented the release or threatened release of hazardous substances into the environment at the PROTECO Site ("the Site"), which is located at Road 385, Km 4.4, Bo. Tallaboa, Peñuelas, Puerto Rico. The Site is the location of a former hazardous waste treatment, storage, and disposal facility ("TSDF"). Operations at the TSDF began in 1975 under the name Servicios Carbareon, Inc.; in 1985, the name was changed to Protección Técnica Ecológica Corp. (i.e., "PROTECO"), which was succeeded by Resources Management, Inc. doing business as PROTECO. During its years of operation, a variety of wastes were accepted at the TSDF from multiple sources, including electroplating sludge, wastewater treatment plant sludge, slurries, petroleum waste, pesticide wastes, and pharmaceutical and manufacturing wastes. Historical records indicate that PROTECO accepted waste from the former Alberto Culver (P.R.) Inc. facility in Naguabo, Puerto Rico.

According to records filed at the Puerto Rico Secretary of State, during the years that Alberto Culver (P.R.) Inc. sent waste to PROTECO, Alberto Culver (P.R.) Inc. was a wholly owned subsidiary of the Alberto Culver Company. On or around May 10, 2011, we understand that Unilever acquired the Alberto Culver Company.

In November 1980, PROTECO submitted a Part A Permit Application pursuant to the Resource Conservation and Recovery Act ("RCRA"), thus entering interim status. In 1987, EPA and PROTECO entered into a consent decree stipulating that PROTECO would perform certain activities to address RCRA violations. In November 1997, after it became apparent that PROTECO had continued to violate RCRA regulations and provisions of the original consent decree, EPA and PROTECO entered into an amended consent decree requiring PROTECO to meet RCRA closure and post-closure care requirements. PROTECO conducted closure of waste units from November 1997 to February 1999 and conducted some post-closure maintenance but stopped performing post-closure care altogether sometime between 2001 and 2009. Since then, EPA inspectors have confirmed that PROTECO is not maintaining the Site and is out of compliance with post-closure care provisions of the amended consent decree.

On May 15, 2019, the Site was added to the "National Priorities List," EPA's list of releases and potential releases of hazardous substances, pollutants, and contaminants that have the potential to pose the greatest threat to public health, welfare, and the environment, established under Section 105(a) of CERCLA, 42 U.S.C. § 9605(a). In response to these releases and threatened releases at the Site, EPA has spent public funds and EPA anticipates spending additional public funds.

To make a confidentiality claim, please stamp or type "CONFIDENTIAL" on all responses and any related documents you assert to be confidential.
